

## Sewerage

The sewerage system in Mishima separates rain water and polluted water. Water used in homes, building and factories is treated at the sewage treatment works and discharged into the river after disinfecting. Also rain water is discharged into the river through gutters and waterways.

### 1. Sewerage Service fee

Anyone living in a home which has a sewerage connection has to pay a sewerage service fee.

### 2. How to pay the fee:

You will be charged for sewerage service every two months in the following A or B methods.

- A. Automatic bank transfer: Your service fee will automatically be deducted from your bank account. Please take a notice from the Sewerage Department or a notice of the charge and your seal (signature is also acceptable) to the banking institution where you have an account. Please fill out the “Application for transfer of account”.
  - B. If your service fee is not deducted from a bank account, you will be sent a notice of the charge every two months. Please pay it at a banking institution (except for post office) by the due date. You can also pay at a convenience store.
- If you use the city water supply, the sewerage and water supply fee will be demanded at the same time.

### 3. Advice for using sewerage system.

Please do not let vegetable waste and dust, frying oil, soil and sand, gasoline etc flow into sewerage. This causes blocked drain pipes.

### 4. When you move to or from Mishima

Please contact the Mishima Water Supply and Sewerage Costumer Center at 055-983-2828

**Inquires:** Sewerage Division, Mishima City Hall Chuo-cho annex, 3F, 5-5 Chuo-cho, Mishima, 411-8666  
(Phone: 983-2661)

Please bring along someone competent in Japanese.
